

Mr. Burns

November 2, 2016

Lighting Notes

Work

- 1) Check lens on channel (92) (appears to be a VNSP).

- 2) Drop all missing color.

- 3) Hang Christmas lights. Patch as follows:
C9 String (371)
Streetlight (372)
Mini Strings (373-384)(sequential)

- 4) Rotator in 302 appears to be jammed.

- 5) Stack two rehearsal cubes in SL and SR Voms. Place 1 36 degree on floor base on each stack. Color with R4215. Patch to channels (341-342, SL-SR)

- 6) Add two 26 degree's on floor bases directly under the SL and SR Vom Box positions (1 SL, 1 SR) with R12/R18/R26 (R18 in SR and R26 in SL can be used at temporary substitute). Patch into channels channels (306-307, SL-SR).

- 7) Channels (221-225) change color to R362.

- 8) Change channels (291-292) pattern to R77734 (Matt has gobos).

- 9) Add second power strip to tech table.

Focus

- 1) Refocus edge on channels (191-194) with designer.

- 2) Channel (297) refocus pattern with designer.
